A photograph showing several business professionals in a meeting. They are dressed in business attire (suits and blouses) and are gathered around a table, looking at documents and laptops. The background is a blurred office setting with large windows.

Let's create

RSWELL, INFORMATION MANAGEMENT
(ECM, BPM, SAP & IBM FileNet)

RSWELL is one of the leading consultants company for implementing **Enterprise Content Management** systems and solutions. Our services include all aspects of a demanding **ECM** of project. Depending on our customers unique situation our advice spans the option of a different system, to a new concept, or system integration in all phases of the implementation. We also are reliable partners in operations and support. As platform we use the services of the market leaders **IBM FileNet**, **Saperion** and **SAP**. We are able to Define, Manage, and implement the project (Functional and technically).

We are experts in all of the following areas:

» **SAP:** Basic Administration, Authorization Management (SAP roles definition, Security Policies definition and controlling ...etc). **SAP DataArchiving** (To define the customer needs, Database analyzing, to integrate with corresponding external repository, executing **DataArchiving** for SAP objects such as FI_Documnts, VBAK ...etc, document lifecycle, retention period, customer reports...etc). **SAP ArchiveLink** (Defining Scenarios, Configure and customizing connections, defining protocols, Global document types, document classes, Workflow...etc. And integrating with the corresponding Repository (IBM FileNET, Saperion, for incoming documents, outgoing documents) and SAP expert Consultants for : Basic, **Netweaver**, **KM**, **FI**, **MM**, **EHS**.

» **IBM FileNET P8.** Defining Business needs. Defining the complete solution, avoiting capture or workload bottlenecks, maintain good performance ...etc. Implement the solution. Integrating with SAP or third applications if were necessary. And installation, configuration and customization for all components.

We are expert on all FileNET P8 set of products (Workplace , Forms , Application Engine, Content Engine, Process Engine, Application Connector with SAP, Records Manager, Capture ...etc).

>> **SAPERION** integration with SAP and BPM (RlinkWeb, Electronic Records, BPM ..etc). Configuration & customization.

>> **WEB Technology** (JAVA, J2EE, IBM WebSphere ...etc).

Please check our experience in our Successful Cases for SAP, or ECM on [Projects area](#) on this web.

Enterprise Content Management covers technologies for the collection, administration, storage, retaining and supply of content; as well as documents to support organizational processes of the enterprise.

Today enterprises increasingly face the challenge to make information available of various formats electronically at any time and place, making the concept of Enterprise content management an important aspect of improving business processes.
